

Wofford Park

Please take note that we are in the hurricane season from June 1st until November 30th.

Although we are not on the coast, hurricanes can release tornados which can come to our area. You will need to be vigilant in listening to the radio, TV, your phone alerts and the National Weather Service alarm which sounds in the event we have a tornado in our vicinity. According to the Weather Channel, the bathroom may be the safest place in the event of a tornado because as many walls as you can put between yourself and the storm could help save your life.

Please say hello to Mr. George, our newest resident.

In the up and coming weeks we will schedule a fire drill and have the fire department demonstrate the use of fire extinguishers. The fire drill and meeting with the fire department are mandatory for all residents. I hope to give at least a 48 hour notice.

All Ladies are invited to our Mother's Day Luncheon on Friday, May 19th @ 12:00 noon.

I thank all of you for helping keep the building clean. Please continue to clean up behind yourself so we can keep this a clean environment.
